Tools/Frameworks: Flask, Django, Express, NodeJs, Spring Boot, HTML, CSS, React, NextJs

Tools: Git, GitHub, Visual Studio, VS Code, XCode, Eclipse, AWS (EC2), Bash, Terminal, OpenAI

Databases: MySQL, SQLite, MongoDB

PROJECTS

Frontend Developer | My Portfolio

November 2023 - Current

A personal portfolio showcasing my frontend development work and modern web technologies.

- Designed and built as a single-page application (SPA) using React and responsive to mobile, tablet or desktop.
- Implemented advanced UI effects using Three.js, Particles.js, and Framer Motion for smooth animations and interactivity.
- Highlights selected projects demonstrating proficiency in modern frontend tools and frameworks.

React Developer | Kim Bowen

October 2023

Designed and developed web application for Warner Brothers Color Key Artist.

- Fully designed a website suitable and fun with react js and css animations with form submissions through form submit.
- Utilization of TSparticles and css keyframes with custom typing display useEffect and useState for landing page.
- Fully responsive and dynamic for all viewing of screen sizes which was crucial for clients needs.

React Developer | Nicolle Bustos

October 2023

React application Portfolio for former CSUN President of American Marketing Association.

- Executed the creation of a portfolio for an application that required one and fully executed with an open source project.
- Used video to learn everything that was being implemented like jwt, tailwind and media query components, etc...
- Configured setup within the tailwind configuration file for layout and design along with Hostinger support for hosting.

Web Developer | Diamond Wings

February 2023

Help put together a website for diamond wings driving company as well as automate scheduling and payments.

- Provided the setup with wordpress, along with a few blocks of code that made that website a little more responsive.
- Also configured a pre-built CMS database to connect automation emails, payments and bookkeeping.
- Helped build a digital business card with QR code falling behind the driving helping others learn more about the company.

PROFESSIONAL EXPERIENCE

Technical Management | MyHomeLA (Keller Williams) | Calabasas, CA

2020-2022

- Handled technical aspects through service and support increasing conversion ratio.
- Implemented solutions that leverage customer interest through automated systems.
- Specialized in predictive analytics with connections between websites, funnels, email, social media advertisements.

EDUCATION AND ACCOMPLISHMENTS
