PROFESSIONAL SUMMARY

Software engineer skilled in frontend, backend and database technologies with deployable production ready applications.

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, Java Spring Boot, Django, Flask, REST APIs

Databases & ORMs: PostgreSQL, MySQL, MongoDB, SQLite, Prisma, Mongoose

Tools & Deployment: Git, GitHub, VS Code, Eclipse, Xcode, Railway, Render, Netlify, Vercel

Core Concepts: Full-Stack Development, CRUD Applications, Authentication, API Integration, Responsive Design, MVC Architecture, Database Modeling

PROFESSIONAL EXPERIENCE

Software Engineer Internship | *PurppleLeafHerbs* | Los Angeles, CA

May 2026 - Current

- Built and deployed a full-stack Next.js app using TypeScript, Prisma, PostgreSQL and Vercel.
- Developed responsive UI sections, blog pages, contact flows, and reusable components.
- Improved SEO and performance with metadata, optimized images, routing, and deployment workflows.
- Worked with the client to build service pages, founder content, testimonials, and blog features.

Software Engineer Internship | *DiamondWings* | Los Angeles, CA

April 2026 - May 2026

- Built and deployed two production Next.js, TypeScript and tailwind CSS websites for Diamond Wings.
- Created a chauffeur service site and an auto concierge inquiry platform with completely custom components.
- Developed responsive SPA layouts, reusable components, service sections, and inquiry flows.
- Improved launch readiness with SEO metadata, sitemap setup, domain support, and Search Console.

Software Engineer Internship | *ChangeLab* | Los Angeles, CA

Dec 2025 - May 2026

- Built an interactive React puzzle app using JavaScript, React DnD, and Context API.
- Implemented drag-and-drop gameplay, shuffle logic, hints, and responsive state management.
- Designed the UX as the solo developer with a focus on clarity, responsiveness, and accessibility.
- Deployed the app with Vercel and added downloadable/PWA-ready support.

PROJECTS

Employee Database | *MERN Full-Stack Application*

Built and deployed a full-stack employee management application using React, Express, MongoDB, and Node.js.

- Developed CRUD features for managing employee records through a responsive React interface.
- Built REST API routes with Express and connected the backend to MongoDB using Mongoose models and validation.
- Deployed with Vercel frontend and Render backend and mongoDB with Atlas.

Pizza Restaurants | *Django Full-Stack Application*

Built and deployed a full-stack restaurant ordering application using Python, Django, SQLite, HTML, CSS, and JavaScript.

- Developed menu category pages, cart functionality, checkout flow, user login behavior, and order confirmation features.
- Implemented backend view logic for cart totals, discounts, delivery fees, tax calculations, and checkout validation.
- Improved UX with responsive styling, form validation, add-to-cart feedback, and Railway deployment.

TV Shows Database | *Java Spring Boot Full-Stack Application*

Built and deployed a Java Spring Boot application with backend validation and database-driven functionality.

- Developed Java models, controllers, routes, and server-side logic using a structured MVC application pattern.
- Implemented CRUD functionality for creating, viewing, updating, and managing TV show records.
- Integrated validation, database persistence, environment variables, and Railway deployment.

EDUCATION AND ACCOMPLISHMENTS

- B.S. in Computer Science (*In Progress - 3.9 GPA*) – California State University, Northridge (CSUN)
- Transfer Program - 3.9 GPA - Programming for Computer Science – Los Angeles Pierce College (LAPC)
- President's Honors List for LACCD and CSUN
- Full-Stack Developer Bootcamp – (*Java, Python, JavaScript*) Coding Dojo Bootcamp, Burbank, CA
